OUR CHILDREN	2
COOPERATION	3
OUR SPONSORS	6
EVENTS, FACTS	7

Here came to the end the year of 2011. We are 4 years old. We have done a lot of things and we are very pleased that the work of the Foundation was supported by more than 20 companies and individuals, who share our views, support our ideas and our 6 programs! And it says that they trust us! This year, we were able to win a grant and a state social order from the Ministry of Social Protection of the Kyrgyz Republic for the project "Knowledge for Life", which will end in February 2012. This is a new phase of our foundation, new opportunities to provide the necessary information and education for sick children, their parents and, most importantly, doctors across the country. And ahead of us there are new ideas, new forms of cooperation and, hopefully, new opportunities to help sick children. And we believe that you are with us in this work!

With kind words, good deeds...

**Motto of
the Founda-
tion:**

**Time is
running out,
and children
need
help now!**

With
faith and
hope ...
Angelina
Garanina
is only 12
years

old ... She likes to dance; she led children's programs on TV. A very funny and cheerful girl. Six months ago, she was worried about her knee, and then she was in a hospital, in a second ... and all without result. After a thorough examination - diagnosis - sarcoma of bone ... for all it was a shock. Thanks to the community of the Diesel internet-forum, doctors in charge of the "charity" section it became possible to arrange the girl in the Petrov Institute of Oncology in St. Petersburg. Our foundation paid the travel expenses for the plane for

Angelina (3 tickets for the horizontal transport) and her mom - 71,240soms. Now Angelina is there, being treated. Many people turned out to be caring, all who can are helping. If anyone can help Angelina, you can transfer the funds to the account of our foundation any amount with a note "for Angelina." Angelina underwent a surgery and is undergoing another round of chemotherapy. A brave and strong little girl, she dreams of the future, she has found many friends. A very big help is being done by the St. Petersburg "Advita" Charity Foundation. Thanks to everyone who had not stood aside, not passed by someone else's misfortune, who had helped and was able to attract more money! Thank you for your participation in the life of a beautiful girl!

The benefit
of doing a
good act is
that you have
used the op-
portunity to
do it.

Seneca Lucius
Annaeus
(Junior)

People with a good heart.

We saw on the web-site www.diesel.kg in the "I'll give a gift" sector an announcement that there were completely free of charge 2 ampoules of immunoglobulin, and that they were given to someone who really needs it. We phoned Eugenia Yavorskaya and learned that the drug remained after the

treatment of her child. We report: this precious gift (parents were not able to afford buying it!) was given to **Zhumabayeva Alia**, a native of Jalal-Abad region with a diagnosis of thrombocytopenic purpura. More than half a year she is being treated at the Department of Hematology National Center of

Mother and Child Health (NCMCH) of the MOH of the KR. Evgeniya, thank you very much from the heart and soul! Let your kids never get sick!

There is no someone else's misfortune...

We already wrote about **Aelita Rysbekova**. The girl has a very rare and complex disease: a tumor of the optic nerve in both eyes. It was necessary to go through a study in Moscow, as the doctors here have not faced such a disease. To raise funds for the girl a charity golf tournament was held, fund-raising was organized by good-hearted people on the www.diesel.elcat.kg web-site in the "Charity" sector. The Dad himself was collecting money among relatives and friends. The funds were collected. The only institution that could help was the **Gelmogldt Research Institute** in Moscow, where there was a queue for the reception and admission for 3 months. Our

foundation through our friends in Moscow got admission in 3 days. This was a small victory! Thanks to Meder and all in the "Kyrgyzstan" airlines tickets were provided on time and without delay: for the dad - a discount, for Aelita - for free! Back and forth two times! And now Moscow and the hospital: a survey, consultation, counseling, even in the **Burdenko Research Institute**... Unfortunately, doctors are not gods! The girl neoplasm of the optic nerve is located in such a place that the entire nerve is affected under irradiation, and this means that at once the girl will get blind. The Dad believes that the medicine is not static, and doctors must come up with something! And

the miracle will happen! Aelita was treated at home until the autumn, in November went back to Moscow for treatment and examination. Now the girl is being treated, as there is progress, Aelita sees better!

The Dad with a beautiful daughter was in our office the day when Aelita was 9 years old! We congratulated her on her birthday and gave a toy bear. She said that it would help her. Let it be a mascot. It is necessary to believe, and then a dream comes true!

Living and working for the benefit of the future.

In Bishkek, on September 20 a fair of non-profit organizations working to protect the rights of children took place. It was aimed at solving social problems in childhood and strengthening of social partnership to improve the situation of children in Kyrgyzstan. Our foundation was a participant of the exhibition. Taking part in this forum, we

not only demonstrated the activities of the foundation, but also shared our experience with other organizations that have set plans for cooperation with other foundations. We found new friends of our foundation. During the exhibition we were able to take part in

Good news.

Our Foundation participated in the contest of social projects for the implementation of the social order for the 2011 announced by the Ministry of social protection of the Kyrgyz Republic. Our pro-

ject on "Knowledge for Life" received approval! The project ac-

tivities included: Competition of child psychologists and educators, a handbook was published, booklets and post-

ers of various diseases for oncology physicians and parents in Kyrgyzstan will be published, training sessions for parents were held and other events. The project results will be announced in late February 2012.

To support a person in distress with a good word is often as important as to timely-switch the arrow on the railway line: only one inch separates a catastrophe from a smooth and safe movement of life.
Beecher

Results of the monthly activity "Beneficial giving"

Do not wait for extraordinary circumstances to do good; try to do good in everyday situations.

Our fund held jointly with partners organized in November 17, 2011 at the Department of Hematology NCMCH of the MOH a charity activity named «The fire of charity will not extinguish », dedicated to the Universal Children's Day. At the time the activity vital expensive drugs were transferred to the children of the department, funds were transferred to the National Blood Center to receive free blood products for the children of the department and intensive care unit, cleaners, detergents, oil and food products were given. A leading mobile operator in Kyrgyzstan - the «Sky Mobile» company - prepared and submitted for children and parents an extremely needed and expensive gift: SIM cards, and for the most needy - brand mobile phones, to be a little closer to their families and friends to be able to communicate with their doctors after discharge, because treatment does not end with discharge and continues for a long time. The total amount of this activity only is 120,000 soms.

This action ends a monthly activity of our foundation, "Beneficial Giving", dedicated to the World Children's Day, celebrated worldwide on 20 November.

It's already 10th campaign conducted by our foundation. Activities had been held at the Department of Surgery of the Institute of Heart Diseases Cardiac Surgery and Transplantation bodies, children's department of oncology of the National Oncology Center, children's rehabilitation center "Umut - Hope", charity foundation "Light of Goodness", two children's homes in the villages of Sosnovka and Semenovka. We invite all concerned people of Kyrgyzstan to

join our initiative and provide all possible assistance to needy children throughout the country. The

total amount of assistance in the monthly activity - 425 000 Kyrgyz S o m s . And all this took place because of the goods transferred from the hotel "Jannat", "Golden Dragon", the French Embassy in the KR, the bank KICB, firms "Shedevr", "Sher," "Detash", which provided us with their products, "Sky Mobile" that collected the children's clothes and toys, other firms.

From all the smiles will brighten.

On October 14 produced by the students of the high school-complex № 70. Children at art lessons prepared colorful and kind smiles for their peers from the Department of Hematology prepared fun gifts that not only took place. On October 27 the "Green apple" annual event took place with a huge success, which collected about 180 kg of apples the department children received emotions as a gift. The joy, laughter and smiles prevailed in the department all day. No partment has made such elevate mood, but also instill confidence in the good and kind. Most importantly, the children helped children!

Charity Marathon

When someone commits a good deed for another, rejoice! Two people just became happy.
Samuel

Our Foundation in conjunction with partners in the department of congenital heart diseases of the Institute of Heart surgery and organ transplantation on October 21, 2011 organized a charity activity named "Touch the heart of a child." At the activity three perfumers imported from Germany, 1,000 needles to them, sent by Martin Friedrichs from Germany, 2 computers, kitchen utensils, cleaners and detergents, food, furniture provided by the Guild of Publishers, and much more - more than 15 titles in all, were transferred to the department. On this day children received one more gift - great clowns came to them. And get a toy of these clowns' hands is almost an impossible dream for sick kids, because they cannot attend because of illness the children's places. How much light, joy and happiness there were in their eyes!

But the department needs in many things: furniture, office equipment, household appliances, medical equipment ... -the doctors, children and their parents will be glad for any help. At the activity acting General Director of the Institute of Heart surgery and organ transplantation Osmonov T.A., parliament deputies Torobekov N.N., a guest from Germany Jeanne Brug-Popova, representatives of the KICBBank, the French Embassy in the KR Alevtina Fourriere, partners of the foundation from the Diesel forum were present. The guests present at the activity, now new partners to our foundation, were handed with a letter of gratitude by the president of the foundation Elena Koneva.

This was the first event held in the marathon to raise funds for breathing apparatus. Then we were joined by staff of the magazine "Little Joy", which presented a gift to children: stationery and games. And in December, in conjunction with them, the Association of Koreans in the KR, a children's show "Aladdin," the "Nasha Marka" company, the restaurant "Eldorado", in the hotel "Golden Dragon" there was a campaign to raise funds, which collected 15,600 Kyrgyz Soms and 100 USD. The marathon was joined with a lot of caring people, companies across the country. In addition to the funds refrigerators, plumbing, chandeliers, etc were given to the department. The results of the marathon will be announced in January 2012. Channel 5, "Evening Bishkek", the web-site www.deisel.elcat.kg and virtually all the media of the republic cover the marathon. Thank you, folks! A low bow!

A thrift-box of hopes

Our Foundation in conjunction with the Guild of Publishers on September 6, 2011 at the Department of Pediatric Hematology of the NCMCH held charity "A thrift-box of hopes" dedicated to the beginning of the school year.

When disaster strikes, then education, development and hobbies recede into the background. Therefore, in the hematology department a whole service to support children and parents was created. Children in the department may take a school training curriculum, there is a developmental program, and there are

even computer training courses. Due to foundation partners, the department library is constantly updated with literature, educational games, stationery. It is these gifts that the Guild of Publishers gave the children this time. In addition, as a charity the Guild had published a collection of magazines and booklets produced by the foundation. The charity activity was attended by the head physician of the NCMCH Miris-

temova G.A.

Sponsors and Partners of the foundation. Who are they?

Happiness is what people want for themselves alone; goodness is what people want for themselves, along with everyone.

L.N. Tolstoy

Amir

We are very grateful to the companies and individuals who share our ideas, trust us and become our regular partners.

Today we tell about two beautiful, kind, sympathetic women.

At one event, we met with Ms. Alevtina Fourriere and since then our cooperation was very fruitful. Embassy of France in the KR and the KICB bank managed to find a way to and gave us 4 computers, 2 printers, 2 TVs, clothes, toys, children's table and ottomans. All the equipment was transferred to the department of surgery of congenital heart defects, children's homes. We are very glad that Alevtina with all her employment finds time to attend the event herself, to see exactly where the goods are passing, and for us it is also an account to our partners. Each of our sponsor and partner must be sure that everything is strictly for the intended purpose.

At the activity in the cardiology department Alevtina met with our good fairy from Germany Jeanne Brug-Popova. Our compatriot is so permeated with our problems that in her spare time and at her expenses she went to hospitals to find the right equipment for us. And she found! More than 200 kg is now waiting for shipment to Kyrgyzstan! And 3 perfusers already are helping to treat children!

Two different women, two different fates, but they share one thing: the desire to help and: there are forces, opportunities, time, many doors open up, new people attracted, and that is the extra help, the help that so much is needed by the sick and disadvantaged children. We are used to talk about a happy childhood, and only caring, kind-hearted people like Alevtina and Jeanne can make it happy. A low bow to you from all those people in whom you instilled confidence in the future!

Unknown benefactors...

Unfortunately, we cannot name all of our sponsors: numerous charity boxes standing across the city, the «QIWI» and "Mobile phone" payment terminals through which the money is received for sick children, show that we have a lot kind and caring people. Dear people unknown to us! On behalf of the foundation, sick children and their parents we express our gratitude to you and assure you that all funds are spent for their intended purposes: blood products and medications for sick children are purchased, the survey is conducted for the neediest and orphaned children. So nice that you can trust us! A lot of people come to the office and bring money, clothes, toys and they do not even want to say their names! This was

most clearly seen when the marathon washeld, people brought in both 300 KGS and 46000 KGS. Believe us, no matter what amount you bring! But the more valuable is the desire to help, not pass by someone else's misfortune, because all our actions sooner or later come back to us. And we firmly believe in it! To help a child to survive, when the state and the parents cannot do this - is the greatest gift that just may be!

Dreams come true at the New Year eve ...

Each year in the New Year eve we presentation with my friends go... to the De- of a soft toy partment of Pediatric Hematology, character so that children do not feel left the next out, and together we celebrate this year, children magical holiday. Our partner the and parents «Sky Mobile» company, theGuild took as a sign of Publishersof the KRcame with of recovery, and better in the future. gifts and Santa Claus and Snow As we have seen, there not those who Maiden Drakoshabrought true hap- received this toy last year! A few piness to sick children, who greeted days later the company, holding a us at the doors of offices. It was charity raffle among employees, evident that they prepared as many brought almost 80 000 soms for of them were in costumes, waiting medicine and blood.

And our publisher partners brought in the department colored paper that is in demand in the department. It is needed for origami, thechildren in the department are happily engaged in this. In these days a lot of gifts were given, but the most important that cannotbe bought anywhere else - is the joy and happiness in the eyes of children who are so painful, who want
